&

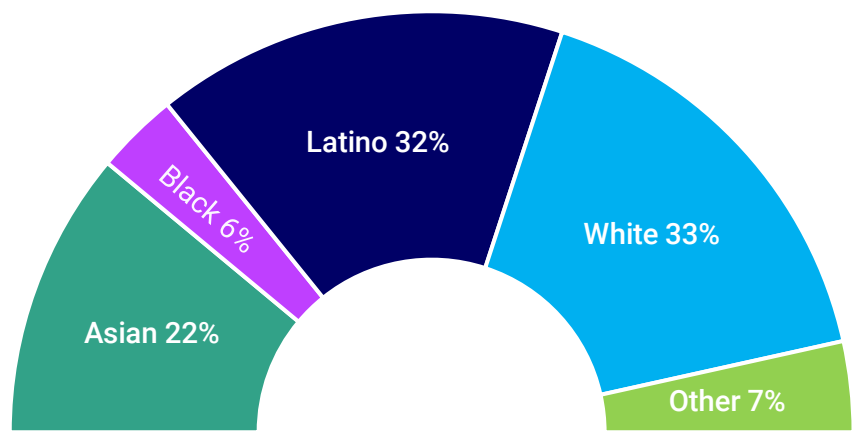

Bay Area

Education Data Snapshot

The San Francisco Bay Area is a resource-full, unique, diverse region. One of the key resources in the region is the education of our 2.3 million young people. How are we doing by our children and youth?

All communities and students across the Bay Area have strengths and talents, but opportunities and resources for student success are not equitably distributed. The data in this report show the latest available information on key metrics related to student success, aggregated across all 9 counties in the Bay Area. We offer this baseline aggregation of data to support informed and innovative approaches to advancing educational equity and justice throughout the region because we all have a stake in education. We also include an appendix with additional data for each Bay Area County. Working together locally and regionally, we can improve educational and life outcomes for our children and youth.

Race/Ethnicity of Bay Area Children & Youth (0-25 years)^{1,2}

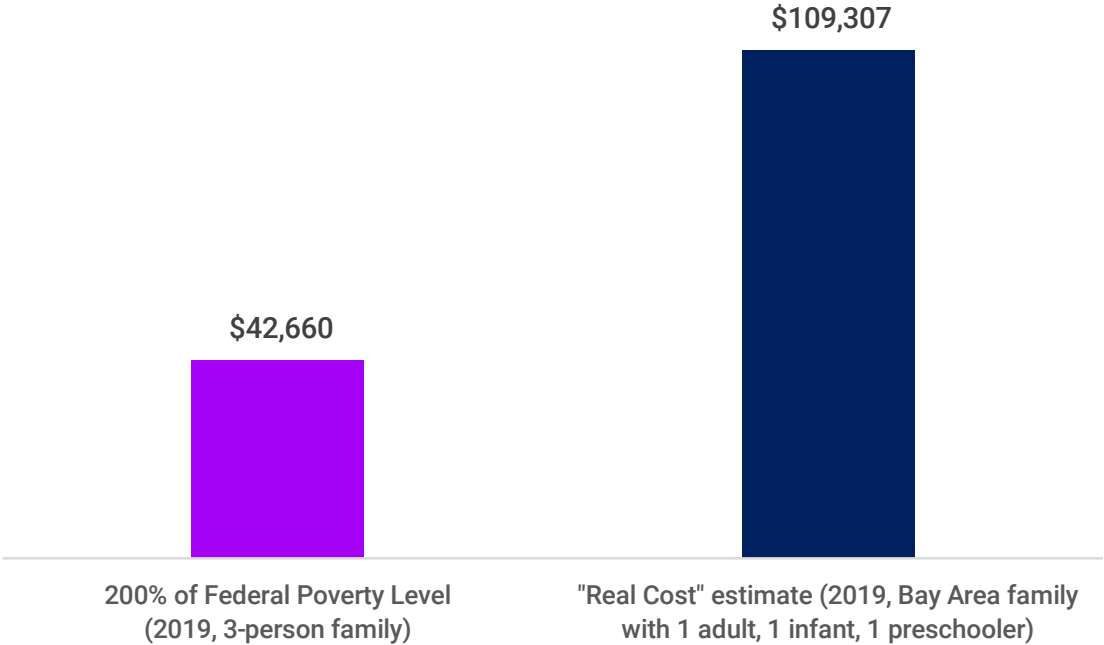

Approximately
151,000 (10%)

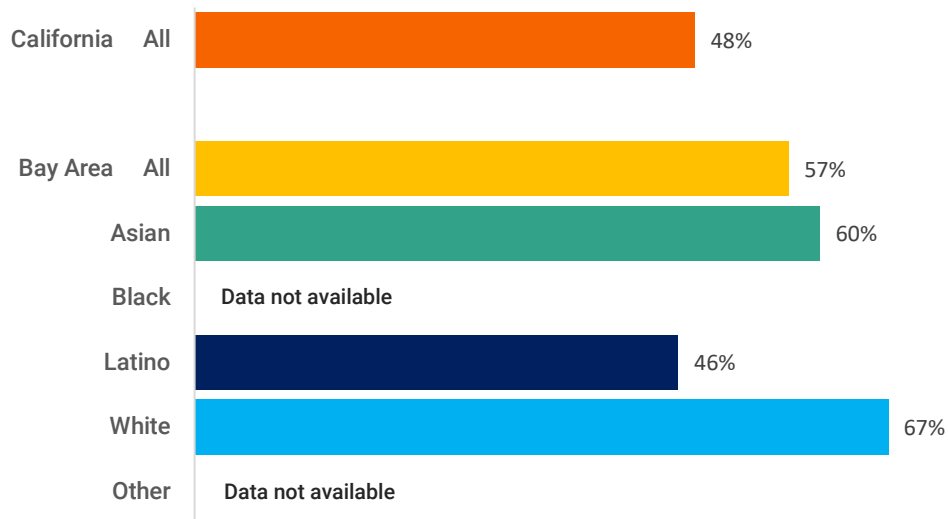

children in the Bay Area
are food insecure

³

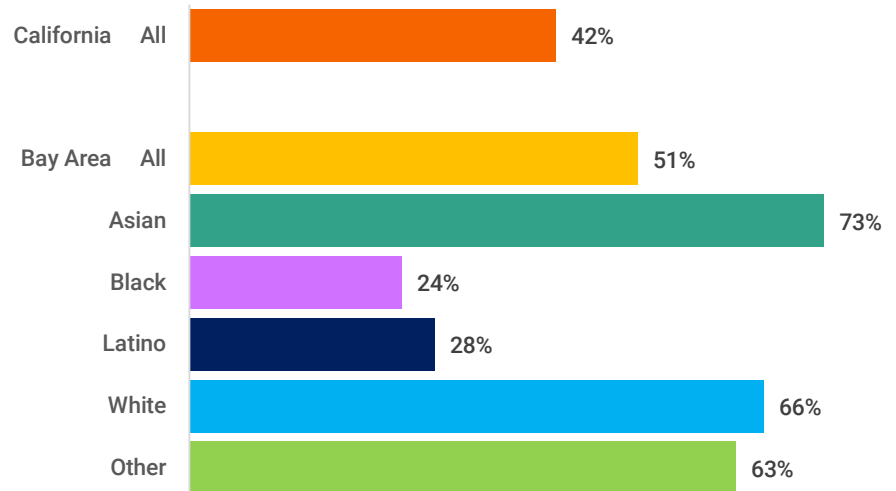

21% of Bay Area Children (0-17 years) Live in Families With Income Under 200% of the Federal Poverty Level^{4,5,6}

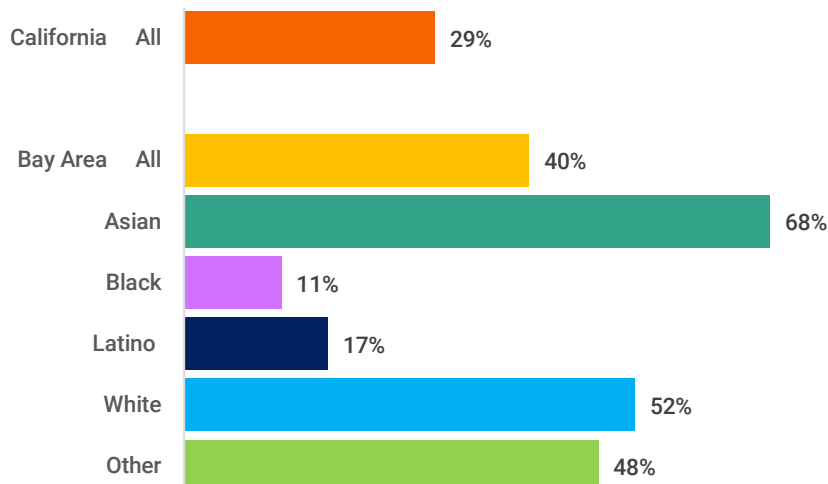

3- and 4-Year Olds Enrolled in Preschool or Transitional Kindergarten⁷

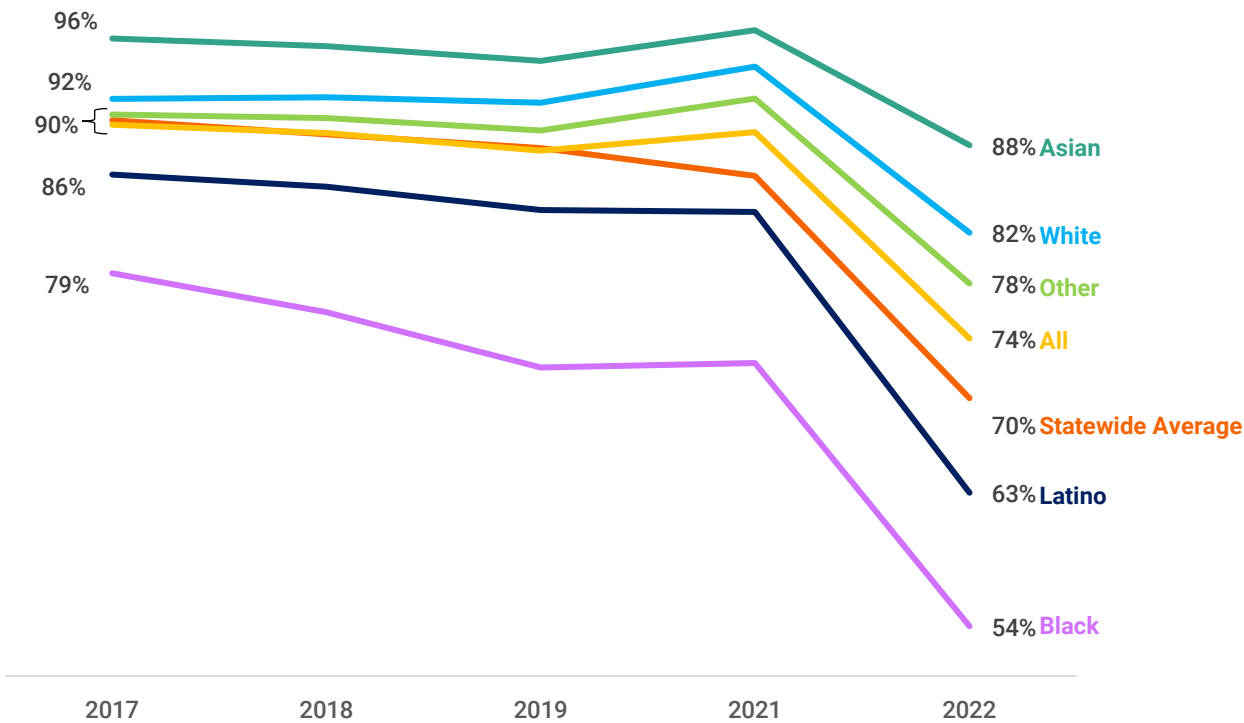

3rd Graders Who Met/Exceeded English Language Arts Standards, 2021-22⁸

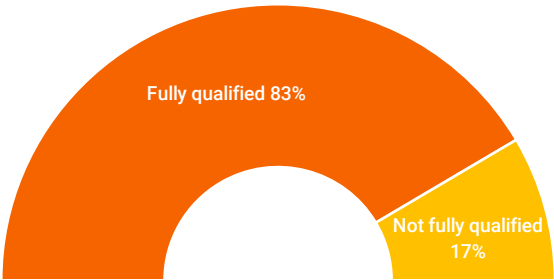

8th Graders Who Met/Exceeded Math Standards, 2021-22⁹

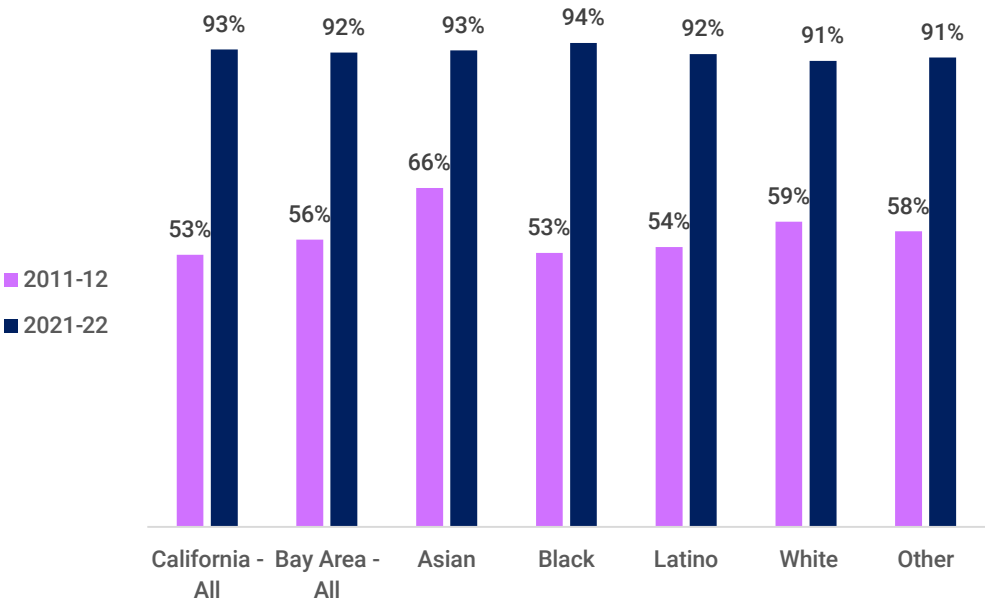

Students Who Were Not Chronically Absent, 2017-2022¹⁰

Bay Area Teachers Who Were Fully Qualified, 2020-21¹¹

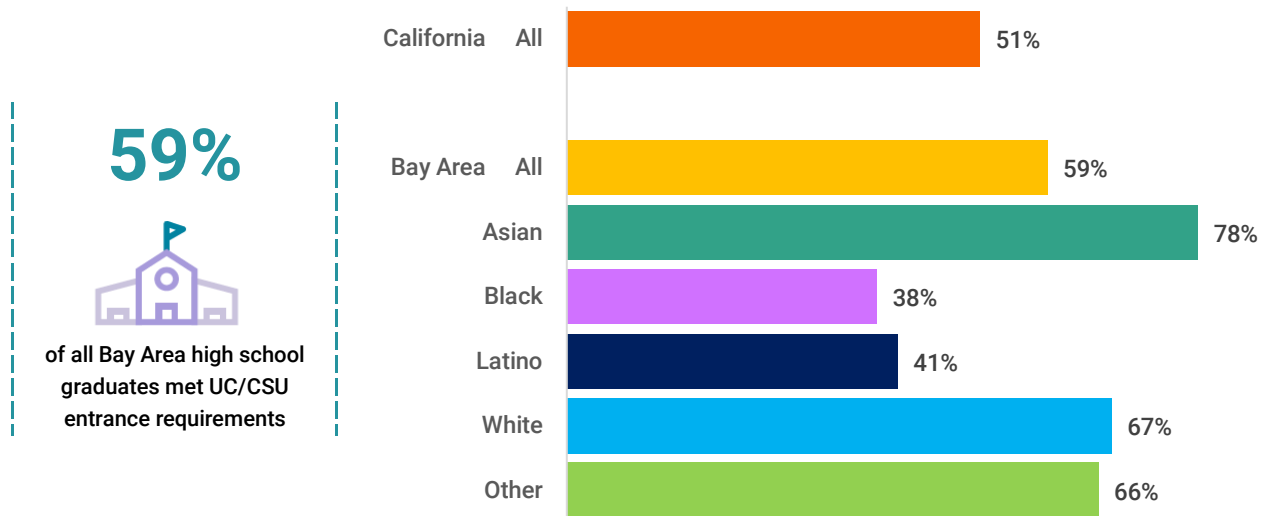

Bay Area Student Suspensions Not Due to Disruption or Defiance¹²

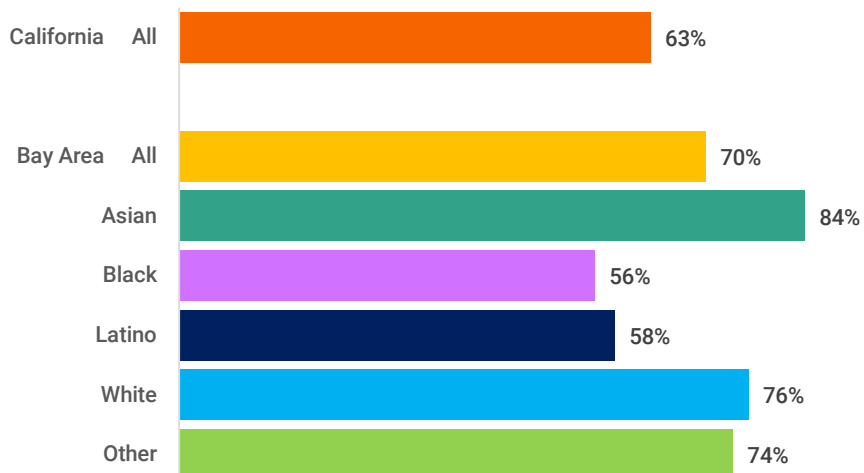

Bay Area Students Who Graduated High School Within 4 Years, 2021-22¹³

Bay Area High School Graduates Meeting UC/CSU Entrance Requirements, 2021-22^{14,15}

Bay Area High School Graduates Who Enrolled in College, 2019-20¹⁶

Facilitating Educational Opportunities for Bay Area Children and Youth

We believe all children should receive the educational opportunities and resources they need to discover and realize their full potential. As this report shows, we have challenges to surmount and successes to spread if we are to fulfill our educational obligations to Bay Area children and youth.

Bay Area nonprofit organizations play a critical role in strengthening our public education system and improving educational and life outcomes, but too many are underfunded and struggling to meet demand.

Equity-driven and grounded in the science of learning and development, OnePercent for Education leverages and channels financial, human and knowledge capital to our thoroughly vetted Nonprofit Partners providing crucial programs and services for those who need them most across all 9 Bay Area Counties.

We're building a movement to advance educational equity and justice: a Culture of Participation that provides trusted pathways for all to give within their means to yield measurable results for children and youth from cradle to career.

Ready to participate? Learn how at www.onepercentforeducation.org!

Children Now is on a mission to build power for kids. The organization conducts non-partisan research, policy development, and advocacy reflecting a whole-child approach to improving the lives of kids, especially kids of color and kids living in poverty, from prenatal through age 26. Learn more at www.childrennow.org.

Children Now also leads The Children's Movement of California®, a dynamic network of more than 5,000 direct service, business, parent, student, civil rights, faith, and community groups from across the state who care about kids and want to see public policies that support their best interests. By becoming a member of The Children's Movement and joining alongside thousands of others, you can make kids California's top priority.

Note: Data is from 2019.

⁷ United States Census Bureau / Explore Census Data (n.d.). Population Reference Bureau analysis of the U.S. Census Bureau’s American Community Survey Public Use Microdata Sample.

Note: Data provided through a special request, representing the Population Reference Bureau’s analysis of the 2016-2020 American Community Survey for 3-and 4-year-olds enrolled in school. Numbers and percentages are rounded to the nearest whole number. Enrollment data were suppressed for Marin and Napa due to unstable estimates.

⁸ California Department of Education (n.d.). California Assessment of Student Performance and Progress, Smarter Balanced Summative Assessments 2021-22 Results for 3rd grade English Language Arts. <https://data1.cde.ca.gov/dataquest/>

⁹ California Department of Education (n.d.). California Assessment of Student Performance and Progress, Smarter Balanced Summative Assessments 2021-22 Results for 8th Grade Mathematics. <https://data1.cde.ca.gov/dataquest/>

¹⁰ California Department of Education, DataQuest (n.d.). School Climate Data – Absenteeism Data 2016-17 – 2021-22.

<https://data1.cde.ca.gov/dataquest/>

Note: Chronic absenteeism is defined as missing at least 10 percent of days in a school year for any reason, including excused and unexcused absences.

¹¹ California Department of Education, DataQuest (n.d.). Staff Data – Staff Assignment Data 2020-2021. <https://data1.cde.ca.gov/dataquest/>

Note: The statewide average for fully qualified teachers was also 83%. In this chart, “fully qualified” teachers reflect the percent of “clear” teaching assignment monitoring outcomes, indicating that all relevant attributes or dimensions of the assignment were authorized by a clear or preliminary teaching credential. In this chart, “not fully qualified” teachers include, for example, those teaching on intern credentials or “out-of-field” (defined as someone who has a teaching credential but has not yet demonstrated subject matter competence in the subject area(s) or for the student population associated with the assignment). For more information about teaching assignment monitoring outcomes, see <https://www.cde.ca.gov/ds/ad/tamoinfo.asp>.

¹² California Department of Education, DataQuest (n.d.). School Climate Data – Suspension and Expulsion Data 2011-12 and 2021-22.

<https://data1.cde.ca.gov/dataquest/>

Note: The data reflect the percentage of students in all public schools, across grade levels, who were suspended for reasons other than disruption/defiance. Assembly Bill 420 (Dickinson, 2014) eliminated defiance expulsions and suspensions for students in grades K-3 inclusive, and Senate Bill 419 (Skinner, 2019) eliminated defiance suspensions for students in grades 4-5. Senate Bill 274 (Skinner, 2023) would permanently extend the ban on willful defiance suspensions in middle and high schools after 2025. Some of the state’s largest school districts including Los Angeles and Oakland Unified School Districts have chosen to ban defiance suspensions for all students. For more information, see <http://www.fixschooldiscipline.org/>.

¹³ California Department of Education, DataQuest (n.d.). Graduation and Dropout Data – Four-Year Cohort Graduation Rate & Outcome Data 2021-22. <https://data1.cde.ca.gov/dataquest/>

Note: The four-year adjusted cohort graduation rate (ACGR) is the number of students who graduate from high school in four years with a regular high school diploma divided by the number of students who form the adjusted cohort for the graduating class. The four-year cohort is based on the number of students who enter grade 9 for the first time adjusted by adding into the cohort any student who transfers in later during grade 9 or during the next three years and subtracting any student from the cohort who transfers out, emigrates to another country, transfers to a prison or juvenile facility, or dies during that same period.

¹⁴ California Department of Education, DataQuest (n.d.). Graduation and Dropout Data – Four-Year Cohort Graduation Rate & Outcome Data 2021-22. <https://data1.cde.ca.gov/dataquest/>

Note: The metric is calculated by dividing the number of “Graduates Meeting UC/CSU Requirements” by the number of “Regular HS Diploma Graduates.” Bay Area Equity Atlas (see next endnote) inspired this methodology.

¹⁵ Bay Area Equity Atlas (n.d.). College readiness: Percent of high school graduates meeting UC/CSU course requirements by race/ethnicity for the nine county Bay Area in 2020. <https://bayareaequityatlas.org/indicators/college-readiness#/?geo=050000000000000017>

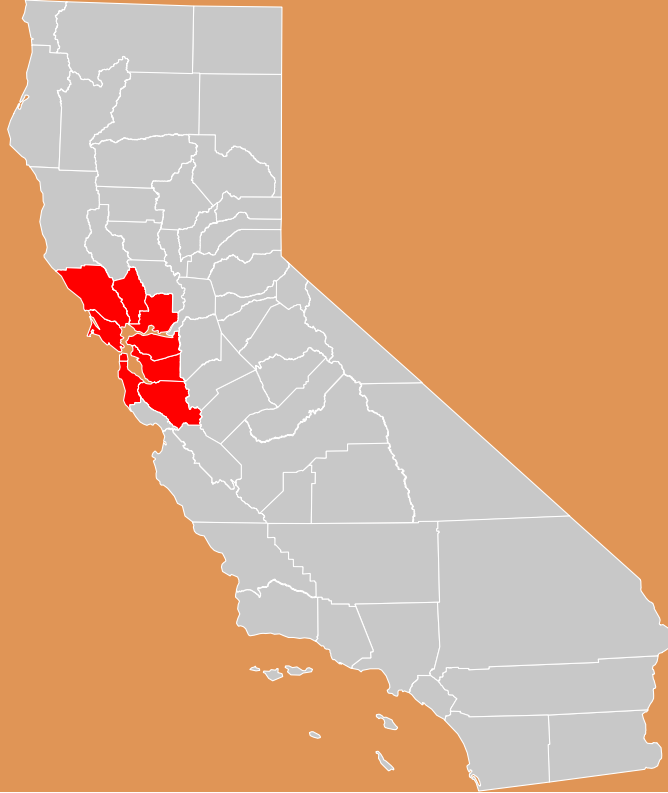

¹⁶ California Department of Education, DataQuest (n.d.). Post-Secondary Enrollment – College-Going Rates 2019-20.

<https://data1.cde.ca.gov/dataquest/>

Note: 2019-20 is the most recent year of data available. The data reflect the rate of all high school completers who enrolled in a postsecondary institution of higher education (e.g., college or university) within 12 months of completing high school. The rate includes students who enrolled in 2-year and 4-year, public and private, and in-state and out-of-state colleges and universities.
